TWS TECHNOLOGIES LLC

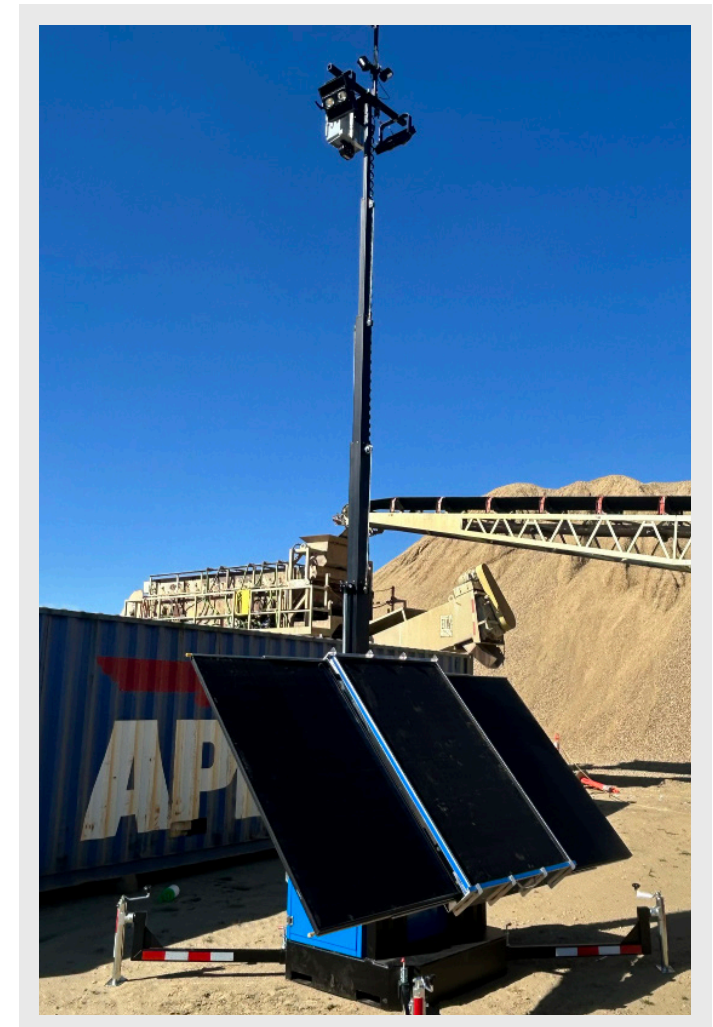

SMART. SUSTAINABLE. SECURE.

Advanced Mobile Security Solutions

TWS Technologies delivers cutting-edge, eco-friendly camera and surveillance solutions designed for advanced deterrence, reliability and efficiency. Our AI-driven security towers proactively monitor commercial and industrial properties in a multitude of urban, rural and remote settings. Our monitoring centre with 911-trained dispatchers provides the highest level of deterrence and protection 7 days a week. With fully-electric and autonomous solar powered equipment, we provide the very best in security services without reliance on diesel or diesel-hybrid fuel systems.

DELIVERING SMART SECURITY SOLUTIONS ACROSS THE U.S.

SMART CAMERAS

Our multi-directional cameras offer four distinct channels to deliver excellent overviews and detailed coverage and include 360° infrared illumination for clear, reflection-free footage and excellent image quality, even in low light or complete darkness. This flexible camera offers various mounting options on both of our tower models. Our cameras also support powerful, analytics-based deep learning, enabling improved processing and storage capabilities. Each camera allows us to collect and analyze even more data than before and delivers valuable metadata, facilitating fast, easy, and efficient forensic search capabilities in live or recorded video.

SUSTAINABLE EQUIPMENT

Our PCS (Pole Camera Systems), EST (Electric Surveillance Tower) and SST (Solar Surveillance Tower) provide an excellent alternative to stationary guard, drive-by and diesel or gas based options. Our PCS and EST equipment utilize a conventional 110V plug and include standard battery backup. Our SST system provides up to 240 hours of uninterrupted coverage on a single charge, making it completely autonomous and ideal for any site.

SECURE MONITORING

Our 911 trained dispatchers offer our customers customizable 24/7 monitoring solutions. Our dispatch process involves a daily equipment operational review, ensuring zero down time. All alerts are immediately received and reviewed by dispatchers, allowing them to take instant action around the clock. All incident observations are recorded and summarized in an individual customer-facing report and all relevant footage is stored for a minimum of 30 days

TWS TECHNOLOGIES LLC

SMART. SUSTAINABLE. SECURE.

**SOLAR SURVEILLANCE
TOWERS (SST)**

- 360° camera surveillance
- Powered by three 450W solar panels
- 32' mast
- Commercial grade lighting
- Back up battery power
- Ideal for remote locations

**MOUNTED
UNITS**

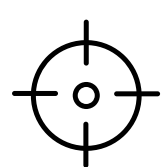

- Up to 180° camera surveillance
- Plugs into 110V outlet
- Back up battery power
- Pole-mountable

**ELECTRIC SURVEILLANCE
TOWERS (EST)**

- 360° camera surveillance
- Plugs into 110V outlet
- 32' mast
- Commercial grade lighting
- Back up battery power
- Modular and movable

CUTTING-EDGE FEATURES. CUSTOM SOLUTIONS.

**AI-Driven Motion
Detection**

**Immediate
Notification**

**No Fuel
No Emissions**

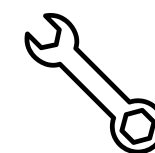

**Two-Way
Audio**

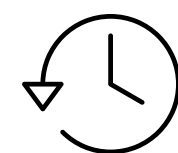

**Remote
Monitoring**

**Back-Up
Battery**

**Maintenance
Free**

**24/7
Surveillance**
